

# Owen Edwards

Web Developer

## Profile

Front-end web developer with an eye for writing quality code and a passion for creating beautiful, responsive websites.

## Education

**Humanities, Coleg Gwent, Newport**

September 2015 — September 2016

**English and Classics, University of Nottingham, Nottingham**

September 2016 — January 2019

## Employment History

**Web Developer at AOTP, Nottingham**

December 2020 — April 2021

Freelance web developer for the UK charity, the Association of University Teachers of Psychiatry.

- Updated general site layout and improved the mobile experience.
- Overhauled the online event experience by streamlining the process of sending out invites and post event certificates, while being on hand during events to ensure things ran smoothly and that any technical questions were immediately answered.
- Maintained the upcoming and recent event pages, and created advertisements and banner ads for AOTP events as needed.

**Shop Assistant at The Locked Horns, Chepstow**

January 2014 — January 2016

Served as a friendly, hardworking, and punctual employee in a customer facing role.

- Worked to improve the organisation and record keeping of the stock room.
- Managed the front desk and provided recommendations for customers, while maintaining a friendly and professional attitude.

## Recent Projects

**Student Psychiatry , [www.studentpsychiatry.co.uk](http://www.studentpsychiatry.co.uk)**

February 2021 — March 2021

A full-stack web app aimed at student psychiatrists, and psychiatry event organizers.

React.js, Redux, Node.js, Express, Express-Session, Styled Components.

- Designed and implemented a clean and responsive interface.

## Details

87 Waltwood Park Drive,  
llanmartin

## Interests

I have a love of classical history and english literature, writing short stories, programming personal projects, and travelling to interesting places.

- Secure login managed with express-session that requires users to register with a valid UK university email addresses. This was a feature requested by the university medical societies I consulted to help keep online event links from leaking to the public.
- Moderation features allowing approved event organizers to add their own events to the calendar.
- Event information is stored on a PostgreSQL database, using the Sequelize ORM.

### **NPC Generator, [www.communitychargen.co.uk](http://www.communitychargen.co.uk)**

December 2020 — January 2021

A fun personal project that not only provides easily accessed random characters for tabletop games, but also allows users to upload their own character ideas to the generator.

React.js, Redux, Node.js, Express, Cloudinary, Styled Components.

- Full-stack web app. Front end created with React, back end created with Node.js and Express.
- Clean and easy to read interface.
- Quickly generate characters for tabletop games.
- Allows users to register and add their own data for others to discover.
- Character text data is stored on a PostgreSQL database using KNEW.js, while images are stored on Cloudinary.
- Image moderation is handled through the Cloudinary interface, using the API to update moderation status on the server and database.

### **Oakfield Photography, [www.oakfield-photography.com](http://www.oakfield-photography.com)**

July 2020 — August 2020

A business website created for a local photographer.

JavaScript, SCSS, Cloudinary.

- Colorful, welcoming design.
- Gallery images automatically requested using the Cloudinary API, allowing the owning photographer to simply upload new gallery images to their Cloudinary account.
- Utilizes the google maps API to provide studio location.

## **🎓 Courses**

### **Modern JavaScript From The Beginning, Udemy**

April 2019 — October 2019

### **The Complete Web Developer Bootcamp, Udemy**

October 2020 — March 2020
