English and Classics, University of Nottingham
Nottingham

RECENT PROJECTS

Feb 2021 — Mar 2021

Student Psychiatry
www.studentpsychiatry.co.uk

A full-stack web app aimed at student psychiatrists, and psychiatry event organizers.

React.js, Redux, Node.js, Express, Express-Session, Styled Components.

- Clean and responsive interface.
- Secure login managed with express-session that requires users to register with a valid UK university email addresses. This was a feature requested by the university medical societies I consulted to help keep online event links from leaking to the public.
- Moderation features allowing approved event organizers to add their own events to the calendar.
- Event information is stored on a PostgreSQL database, using the Sequelize ORM.

Dec 2020 — Jan 2021

NPC Generator
www.communitychargen.co.uk

A fun personal project that not only provides easily accessed random characters for tabletop games, but also allows users to upload their own character ideas to the generator.

React.js, Redux, Node.js, Express, Cloudinary, Styled Components.

- Full-stack web app. Front end created with React, back end created with Node.js and Express.
- Clean and easy to read interface.
- Quickly generate characters for tabletop games.
- Allows users to register and add their own data for others to discover.
- Character text data is stored on a PostgreSQL database using KNEX.js, while images are stored on Cloudinary.
- Image moderation is handled through the Cloudinary interface, using the API to update moderation status on the server and database.

Jul 2020 — Aug 2020

Oakfield Photography
www.oakfield-photography.com

A business website created for a local photographer.

JavaScript, SCSS, Cloudinary.

- Colorful, welcoming design.
- Gallery images automatically requested using the Cloudinary API, allowing the owning photographer to simply upload new gallery images to their Cloudinary account.
- Utilizes the google maps API to provide studio location.

Dec 2020 — Apr 2021   **Web Developer, AUTP**   Nottingham

Part time web developer for the UK charity, the Association of University Teachers of Psychiatry.

- Updated general site layout and improved the mobile experience.
- Managed online events such as teaching conferences and student events. Arranged Eventbrite payments and setting up zoom links.
- Maintained the upcoming and recent event pages, and also created advertisements and banner ads for AUTP events as needed.

Jan 2014 — Jan 2016   **Shop Assistant, The Locked Horns**   Chepstow

Served as a friendly, hardworking, and punctual employee in a customer facing role.

- Organised the stock room and managed purchases.
- Created excel spreadsheets to track inventory.
- Managed the front desk and provided recommendations for customers, while maintaining a friendly and professional attitude.

COURSES

Apr 2019 — Oct 2019   **Modern JavaScript From The Beginning, Udemy**

Oct 2020 — Mar 2020   **The Complete Web Developer Bootcamp, Udemy**

INTERESTS

Prior to falling in love with programming and deciding to pursue a career as a web development, I loved to create modifications for some of my favourite games and share them with their communities.

I also have a love of classical history and english literature, writing short stories, and travelling to interesting places.
